## CONTACTLESS SMART TICKETING

### Parking & Public Transportation

Syndicate RFID offers a range of innovative & high quality contactless ticketing solutions for public transport, access control & parking applications offering users benefits of faster transactions, multiple payment options, enhanced security against fraud and operational efficiency; all leading to cost reduction and increased revenue.

Tickets can be supplied in fan-folded or reel format for Automatic fare collection and ticket vending machines & in booklet form or cut singles for manual issuing. A wide range of Thermal and non-thermal Paper & PET materials can be chosen depending on the ticket life cycle. We also offer ticket personalization options such as:

- 4c artwork on the tickets
- Write and/or read protection
- Printing of the IC UID number
- Encoding of the IC
- ISO or custom sizes as per system integrators specification.

#### KEY FEATURES

- Anti-Counterfeit tickets
- Complete Data protection by encryption, certification and OTP (One Time Programmable)
- Fast transaction times & less queuing at gates
- Low cost of maintenance as reading and writing are performed contactless

#### TYPICAL APPLICATIONS

- Parking
- Transit
- Ski Passes/ Event Ticketing/ Hotel Badges etc.
- Identification Cards
