SMART RFID LABELING SOLUTIONS

Manufacturing & Supply Chain

Syndicate RFID Smart labels can provide information for a number of applications in the manufacturing industry & supply chain management. The unique information of products, batches, cartons and pallets etc. can be captured automatically once the RFID labels are applied at product inception, and the information is highly accurate and secure.

Our wide range of RFID labels are used for production & inventory control system, smart shelves real time inventory, supply chain security system and logistics management etc. We offer personalization services which includes data pre-encoding, variable data printing & 4c printing.
